

Kyriakos is a senior Health, Safety, Environment and Quality (HSEQ) leader with more than 20 years of experience driving safety excellence across the energy, manufacturing, maritime, and defense sectors.

Kyriakos started his career as a commissioned Naval Engineer Officer from the Hellenic Naval Academy and holds a degree in Electrical Engineering from the National Technical University of Athens

He has served in executive roles including Global HSE Director, Head of HSE, and QEHS Director for multinational organizations, with full strategic and operational accountability for HSE governance, risk management, and performance.

Kyriakos brings a practical, leadership-driven approach to safety—bridging frontline operations with strategic governance.
