

Evangelos Tzitzis
Co-Founder & Managing Director
Aegean Robotics | Greece

Evangelos Tzitzis is a senior executive with extensive experience in unmanned and robotic systems, specializing in applications that enhance safety, situational awareness, and operational resilience. He has held key leadership roles as Operations Director and Business Development Manager in leading technology-driven organizations within the sector.

He was the first to introduce the operational use of drones for HSQE monitoring, as well as the deployment of counter-drone systems for the protection of critical infrastructure in Greece and Southeast Europe- contributing to the advancement of modern safety practices and risk mitigation strategies.

As Co-Founder and Managing Director of Aegean Robotics, Evangelos Tzitzis leads the development and deployment of mission-ready unmanned and robotic solutions designed to support emergency response, industrial safety, and the protection of critical assets across the Energy and Critical Infrastructure sectors.
