

Chrysi Baka is an experienced professional in road safety, transport risk management, and operations. She is involved in developing safety practices, supporting compliance frameworks, and improving fleet performance and daily operational processes. With a strong foundation in ISO 39001 and ISO 45001 systems, driver behaviour initiatives, and continuous improvement methodologies (Lean & Six Sigma), she focuses on the practical integration of safety, efficiency, and business performance. She has also completed executive education programmes in business management and data driven decision making through LSE and MIT.
