

Christina Iro is an EHS Consultant with 5 years of experience, primarily in the construction sector, contributing to health and safety on large-scale projects. She holds an MSc in Civil Engineering and is a certified ISO 45001 Lead Auditor, with additional training in occupational health and safety through NEBOSH.

She is currently involved in a data centre development in Germany, where her work continues to focus on implementing practical safety management systems and fostering people-centered safety cultures across diverse, multidisciplinary teams. Working in international settings, she brings a strong focus on communication, engagement, and proactive safety practices.

Academically, she has published *“A Perception Study on the Safety of Autonomous Urban Transit,”* exploring how individuals perceive and respond to technology-driven change.

She previously co-moderated the 17th Safety Gala and this year she will co-facilitate the workshop “Prudens (Εχέφρων) Use of Technology and AI in Driving Changes in Safety Leadership and Culture” in Delphi.
