

- Bio: Ioannis Karkanias holds a PhD in Experimental Particle Physics from the Aristotle University of Thessaloniki and an MSc in Elementary Particle Physics from Durham University (UK). During his doctorate Ioannis worked as an author of ATLAS, currently the biggest particle physics experiment at the Large Hadron Collider (LHC) at CERN, researching the application of modern Machine Learning methods within the statistical computation pipelines in search of exotic physics interactions. At Anzen, Ioannis's work mainly involves the R&D and testing of algorithmic or AI solutions and data automations to support the Anzen platform.
